

PARENTS PLEASE READ!

At the beginning of each science class, ALL students will place their cell/smart phones inside a container provided specifically for this purpose. Phones will be turned off and placed, facing the back of the container.

They will be absolutely safe and secure!

If the student refuses to do as requested, they will be asked to place their phone in their locker. If they refuse this, they will be sent to the office to turn their phone into the principal/vice-principal.

Please discuss this expectation with your student! THANK YOU!

PERSONAL ITEMS

Please DO NOT bring in:

- Personal electronics (cell phones, tablets, etc.)
- Purses and bags
- Lunch boxes
- Food (includes candy, gum,) and drinks
- Body sprays/perfumes (they can be worn, but not sprayed in the classroom)

ALL items of a personal nature must be put away or placed in your locker. DO NOT bring items to school that you see as valuable. There are no guarantees if lost or stolen.

FOOD & DRINK

For your safety and the safety of others, food (includes gum & candy) and drink are not allowed unless otherwise discussed with Miss Starman. Miss Starman will often give out candy/treats as incentives. Candy/food from other classes need to be consumed **BEFORE** entering my classroom.

Those with medical requirements will be exempt from this expectation.

DISCIPLINE

All discipline procedures will follow those given in the student handbook. For questions on the handbook, please contact Mr. Goss, principal, or Mrs. Clements, vice principal.

Classroom Discipline Procedures

- 1^{st} offense \rightarrow Verbal warning
- 2^{nd} offense \rightarrow Discussion outside classroom
- 3rd offense → Detention & parent contact
- 4th offense → Sent to office

Students who exhibit severely disruptive behavior are sent to the office and will be disciplined as Mr. Goss or Mrs. Clements deem necessary.

NOTE: More severe or extremely disruptive behaviors may result in severe consequences. Severely disruptive students will be removed from the classroom, immediately. This is at the teacher's discretion when the safety of others is at risk.

GROUP WORK

Science requires group work, either in a lab or during a class project. Be prepared to participate to the best of your ability.
